United Nations Documents Index

International Organisations Publications

Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of the structure, competence, and management of International Civil Aviation Organization (ICAO) provides substantial and readily accessible information for lawyers, academics, and policymakers likely to have dealings with its activities and data. No other book gives such a clear, uncomplicated description of the organization's role, its rules and how they are applied, its place in the framework of international law, or its relations with other organizations. The monograph proceeds logically from the organization's genesis and historical development to the structure of its membership, its various organs and their mandates, its role in intergovernmental cooperation, and its interaction with decisions taken at the national level. Its competence, its financial management, and the nature and applicability of its data and publications are fully described. Systematic in presentation, this valuable time-saving resource offers the quickest, easiest way to acquire a sound understanding of the workings of International Civil Aviation Organization (ICAO) for all interested parties. Students and teachers of international law will find it especially valuable as an essential component of the rapidly growing and changing global legal milieu.

A Dictionary of Travel and Tourism Terminology

This fully revised and updated second edition provides over 7,000 definitions of travel and tourism terminology used throughout the world, highlighting the many differences between US and European usage. It covers all aspects of the tourism industry, including hospitality, transport, and ancillary services. It explains the operating language of the travel industry, acronyms and abbreviations of organizations, associations and trade bodies, IT terms and brand names, and provides website addresses. Entries vary from one-line definitions to 500 word articles, and references are provided for further reading. This new edition contains over 500 new entries and the unique cross referencing system has been extended; for example accessing any entry about business travel leads to over 70 others. It is an essential reference tool for anyone involved in tourism research, and everyone in the travel industry.

Aviation Law Reporter

Provides over 6,500 definitions of travel and tourism terminology, including the operating language of the travel industry, acronyms of organizations, associations, and trade bodies, IT terms, and brand names. Completely up to date, this dictionary covers the implications of web technology and social media on the travel and tourism industry, as well as new products and services, such as e-tickets, home-based travel agents, awareness amongst consumers and within the industry of terror-threatened travel, recent changes in legislation, and environmental concerns. Useful appendices include the World Tourism Organization Global Code of Ethics for Tourism, the recommended tourism syllabus content for Higher Education courses worldwide, and a list of the EC Neutral Computerized Reservation System Rules. Providing a wealth of information on one of the fastest-growing global industries of the 21st century, this dictionary is the ideal point of reference for students taking travel, tourism, and hos

Weekly Compilation of Presidential Documents

The rise of a new and dynamic low cost airlines, led by easyJet, Ryanair, Go and Buzz, is currently Europe's biggest business success story. Massively innovative marketing strategy, youthful and larger-than-life executives, and high profile personality clashes all feature in this 'David and Goliath' saga with only one winner: the airline passenger, who for the first time in aviation history gets the best end of the deal. Millions of people who were previously wary of air travel on the grounds of expense are now cheerfully winging their way around Europe at rock bottom prices and adding to the quality of their lives. But where did it all start? Who came up with the idea of ticketless booking via the Internet? How do these airlines make such profits when they virtually sell the seats for free? Is this the pattern for all future air travel? And possibly the biggest question of all: are they safe? Simon Calder, Britain's leading investigative travel journalist, probes deep beneath the surface of highly successful recent television programmes like Airline and proves that an attractively unique proposition plus top business skills can still get the required result even in these difficult times. The triple whammy of astonishing low-priced tickets, interesting and off-the-beaten-track destination, and the popular use of conventional local and regional airports with fast turnaround times, has enabled these modern pioneers to reinvent the travel habits of a nation.
