A NEW YORK TIMES BESTSELLER "Valerie has been one of Barack and my closest confidantes for decades the world would feel a lot better if there were more people like Valerie blazing the trail for the rest of us."--Michelle Obama "The ultimate Obama insider" (The New York Times) shares her journey at a pivotal moment in American history When Valerie Jarrett interviewed a promising young lawyer named Michelle Robinson in July 1991 for a job in Chicago city government, neither knew where that meeting might take them. Jarrett would go on to become a trusted friend and advisor to Michelle and Barack Obama -- and one of the most visible, influential African-American women of the twenty-first century. Now, in her forthright and optimistic memoir, Jarrett shares her experience as a mother, daughter, and woman who's experienced the magic that happens once we cast aside any unrealistic expectations of a perfect life or a perfect outcome. In *Finding My Voice*, she offers a galvanizing testament to the power in staying open to a change in course and an embrace of the uncomfortable. Only then, she argues, can we move forward together and truly learn to value--and listen to--our own voices.

Continuum's Guides for the Perplexed are clear, concise and accessible introductions to thinkers, writers and subjects that students and readers can find especially challenging. Concentrating specifically on what it is that makes the subject difficult to fathom, these books explain and explore key themes and ideas, guiding the reader towards a thorough understanding of demanding material. Benedict de Spinoza is a major philosopher of enduring influence and importance, whose work is encountered by all serious students of Western philosophy; his *Ethics* is one of the seminal works of moral, religious and political thought. Nevertheless, Spinoza is a considerable challenge for the modern student; his language, rooted in the vocabulary of late Medieval scholasticism is frequently opaque, while the esoteric themes explored in his work often require elucidation. *Spinoza: A Guide for the Perplexed* provides that elucidation, offering a thorough account and analysis of Spinoza's key works and overall philosophical project. The text equips the reader with the necessary means to draw full and clear understanding from Spinoza's often inaccessible language and complex philosophical system and method. His *Ethics* and political treatises are covered in detail; Spinoza's 'geometrical' approach to his subject is opened up, and his obscure terminology fully explained. The book concludes with a valuable assessment of Spinoza's enduring influence and his relevance for contemporary philosophical debates and concerns. It is an excellent support resource for anyone trying to get to grips with this challenging and important philosopher.

The Key to Understanding Global History

The War on Our History Confederate memorials toppled . . . Columbus statues attacked with red paint. They started with slave-owning Confederate generals, but they're not stopping there. The vandals are only pretending to care about the character of particular American heroes. In reality, they hate what those heroes represent: the truths asserted in the Declaration of Independence and embodied in the Constitution. And they are bent on taking America down and replacing our free society with a socialist utopia. All that stands in their way is Americans'

reverence for our history of freedom. Which is why that history simply has to go. Now, Jarrett Stepman, editor at The Daily Signal and host of Right Side of History, exposes the true aims of the war on our history: The war on America: World history is full of conquests and suffering indigenous peoples. Why target Christopher Columbus? What they really want to tear down is America. The war on Thanksgiving: World history is full of colonists. Why target the Pilgrims? What they really want to tear down is American freedom and prosperity. The war on the Founding: World history is full of slavery. Why target Thomas Jefferson? What they really want to tear down are the rights endowed by our Creator. The war on the common man: World history is full of victorious generals and populist politicians. Why target Andrew Jackson? What they really want to tear down is democracy. The war on the South: World history is full of civil strife. Why target Confederate heroes like Robert E. Lee? What they really want to tear down is respect for America's past and the reconciliation that renewed our Union. The war on patriotism: World history is full of national pride. Why target Teddy Roosevelt? What they really want to tear down is the idea of American greatness. The war on the American century: World history is full of bloody wars. What they really want to tear down is America's defeat of totalitarianism. If America is to survive this assault, we must rally to the defense of our illustrious history. The War on History is the battle plan.

In histories of music, producers tend to fall by the wayside--generally unknown and seldom acknowledged. But without them and their contributions to the art form, we'd have little on record of some of the most important music ever created. Discover the stories behind some of jazz's best-selling and most influential albums in this collection of oral histories gathered by music scholar and writer Michael Jarrett. Drawing together interviews with over fifty producers, musicians, engineers, and label executives, Jarrett shines a light on the world of making jazz records by letting his subjects tell their own stories and share their experiences in creating the American jazz canon. Packed with fascinating stories and fresh perspectives on over 200 albums and artists, including legends such as Louis Armstrong, John Coltrane, and Miles Davis, as well as contemporary artists such as Diana Krall and Norah Jones, *Pressed for All Time* tells the unknown stories of the men and women who helped to shape the quintessential American sound.

What did you do before Google? The rise of Google as the dominant Internet search provider reflects a generationally-inflected notion that everything that matters is now on the Web, and should, in the moral sense of the verb, be accessible through search. In this theoretically nuanced study of search technology's broader implications for knowledge production and social relations, the authors shed light on a culture of search in which our increasing reliance on search engines influences not only the way we navigate, classify, and evaluate Web content, but also how we think about ourselves and the world around us, online and off. Ken Hillis, Michael Petit, and Kylie Jarrett seek to understand the ascendancy of search and its naturalization by historicizing and

contextualizing Google's dominance of the search industry, and suggest that the contemporary culture of search is inextricably bound up with a metaphysical longing to manage, order, and categorize all knowledge. Calling upon this nexus between political economy and metaphysics, Google and the Culture of Search explores what is at stake for an increasingly networked culture in which search technology is a site of knowledge and power.
